- **Level 4 Certification Electronic Systems Technician**, Associated Builders And Contractors, Harleysville, PA, April 2014

EXPERIENCE

DICKS SPORTING GOODS, Pittsburgh, PA

2018 – 2023

Software Engineer II

Developed and maintained DICK'S, Golf Galaxy, and other brand's homepage, header / footer, and product description pages.

- Implemented best technical practices inside a large E-Commerce platform.
- Partnered with the development team to create custom layouts and features, using multiple technical languages leading to multiple outcomes that had 1% or more positive sales impacts that generated \$10's of millions in projected profit.
- Kept up to date with the latest development trends and consistently learned about the industry to master the craft. This for example, allowed me to create and set the core state store using NGRX for our angular applications resulting in shorter dev time on projects, cleaner code and better performing applications.
- Utilized best practices when building and deploying applications such as CI / CD, Unit Testing, and more.
- Partnered closely with the UX / UI team to enhance customer-facing apps to drive high-performing sales results.
- Utilized and teamed with CMS to implement marketing data on the website.
- Mentored and trained junior engineers, interns, and contractors.
- Developed and maintained a CRUD application.
- Debugged and resolved bugs inside a variety of Angular and React applications.
- Experienced working with RESTFUL APIs.

DAY VISION MARKETING, Allentown, PA

2018 - 2018

Marketing | Website Consulting Contractor

Project-managed E-commerce and WordPress websites.

- Developed and built wireframes for the CMS platform.
- Managed client SEO and data analytics reports.
- Collaborated with the Design team to implement the best UX / UI practices.

PACKER MARKETING, Coopersburg, PA**2016 - 2017****Marketing / Website Consulted Contractor**

Executed with the Marketing manager to develop creative solutions for clients.

- Consulted clients with the lead manager and identified specific needs aimed at designing websites that attracted appropriate audiences to promote brand, image, and business volume.
- Identified inefficiencies of the the website, including text issues, structure, and navigation challenges contributing to an excessive bounce rate / 92% for a law firm company.

EDUCATION**Associate Degree, Computer Information Systems**

Community College Of Alleghany County, Pittsburgh, PA
